

ST ERME NEIGHBOURHOOD PLAN

RESULTS OF THE SURVEY CARRIED OUT IN

MARCH 2015

The survey was delivered to every household in the parish, local organisations and known businesses. Additional surveys were available from the local shop, public house and the community centre. Exhibitions were held on 12th March 2015, 13th March 2015 and at the Annual Parish meeting on 16th March 2015.

This was also advertised in the parish noticeboards, the St Erme Village Voice, the local Post Office/Stores, public house, community buildings and on the council's website.

Residents were invited to give their views on producing a Neighbourhood Plan and to highlight and comment on the areas they wished to be included.

The consultation period ran from 1st March 2015 to 31st March 2015.

The results of this survey are shown below:

ABOUT YOU

Are You	Male	Female	Organisation	Business	Blank	TOTAL
	52	62	9	1	1	125

WHAT AGE?

AGE	76+	66-75	56-65	46-55	36-45	26-35	16-25	Under 16	Mixed	Blank	TOTAL
	23	26	22	16	20	3	2	3	3	7	125

HOW LONG HAVE YOU LIVED IN THE PARISH?

Under 1 year	1 - 5 years	6 - 10 years	11-20 years	over 20 years	Blank	TOTAL
1	8	17	23	42	35	125

QUESTION		YES	NO	BLANK	Don't Know	Other Topics
1) Do you think we should carry out a Neighbourhood Plan		122	2	1		
3) Do you feel a Neighbourhood Plan Would be good for our parish		123	2			
HOUSING						
5) Would you like the plan to include housing		115	6	4		
BUSINESS						
7) Would you like the plan to include business opportunities and employment		67	24	2	1	
Leisure and Community Facilities						
9) Would you like the plan to include leisure and community facilities		104	13	8		
Education and Adult Learning						
11) Would you like the plan to include education and adult learning		89	28	8		
Infrastructure						
13) Would you like the plan to include infrastructure		113	7	5		
Public Open Spaces						
15) Would you like the plan to include public open spaces		118	5	2		
Highways (Byways, footpaths, cycle ways, roads)						
17) Would you like the plan to include highways		117	5	3		
Renewable Energy

Renewable Energy		49
Historic and natural Environment		47
Business		33
Rural Dwellings		31
Education and adult learning		22
Left blank		2

2) Should we carry out a neighbourhood plan comments?

- It is very important for local people to have more say in the future of their parish, where they live work and play
- Helps us have a say in our future
- Everything to gain nothing to loose
- The group were 10 for and 1 against for this
- We cannot avoid future development but this should be in a controlled and acceptable way
- This has been a rural community for a very long time and is beneficial to humanity, giving opportunity for normal living
- So we have more say in where we live
- If it will actively benefit the village and enough people are willing to volunteer their time and their expertise
- Yes otherwise the time spent on the VDS is effectively wasted
- If we don't participate we won't have a say in the future of the neighbourhood
- Absolutely
- To keep control
- It is in the interest of all people in the village
- Excellent good idea, pleased
- Excellent, I'm pleased
- It is important to make the village fit the true needs in the coming years ahead
- Yes so that we have a say in future developments
- It's important for the village
- To ensure future development and growth is planned and not forced upon the parish
- Yes so that local people have a say
- I think it would help protect us from unwanted over development
- If not any changes whatever will be done without any thought or consultation with people who live here
- Without a NP our community is vulnerable to inappropriate development. With a NP we have at least some control
- Too much development would change the village and spoil rural feel of location
- Without it the parish cannot enforce its will with regards to any aspects of future development
- Really important that the parish has an adopted plan with specific policies which will help our community grow as we want it to
- It is vital for future development and sustainability, allowing residents a say in how the village grows
- Essential for the future of the village
- We need to have a say in any developments in the village

- The importance of such a plan for the future of any community cannot be over-emphasised and in particular to ours where there is much at stake
- More customers for the Community Centre
- If it helps to stop 47000 homes being built
- Need to protect our parish
- Important follow up the VDS
- To improve our village
- Our community/parish needs could be overruled by Cornwall Council or even National Policies
- To set perimeters over what the majority of the parish need and feel happy with. It gets people thinking what is important for them and their neighbours, in advance of application of potential development.
- Trispen well located on approach to Truro, but preserve village feel, a now very rare around Truro
- The village/parish needs to control its own destiny in a fair and honest process
- The message at the parish council meeting is very clear
- We should take the initiative to create plan that is right for our neighbourhood rather than wait for unscrupulous developers to do what they like
- Important for parish to provide a position on how it wants to be
- If the village does not do this we cannot complain when things happen which we do not like
- Local people looking at local needs
- Hopefully it should reflect local need
- This will provide people living within the community an opportunity to share their views and opinions
- Yes it is very important that everyone has a say in what goes on in the village
- It is a good opportunity for residents to feel their opinion can be heard
- Our community/parish needs could be overruled by Cornwall Council or even national policies

2b) Do you feel a Neighbourhood Plan would be good for our parish?

- So we can steer development in the direction which the majority of people would like
- It could bring some realistic information and ideas to the parish as a whole instead of being dictated to by the powers above
- To increase community spirit
- Helps us have a say in our future
- Why not
- You should never give up the right to have your say/opinion
- If it will actively benefit the village and enough people are willing to volunteer their time and their expertise
- Yes St Erme could see a lot of development over the next decade. We need some influence
- If we don't participate we won't have a say in the future of the neighbourhood
- We think it is essential
- Absolutely - again able control what is planned
- If not we would be ruled by Cornwall Council (Bad news)
- Good
- Good idea
- Valuable assets
- Yes, but I would not like to see standardisation of housing where imagination was totally crushed
- To maintain its rural character (our village)
- We need to have planned structure for the future
- Future needs to be planned
- So that we can have most if not all decisions made by us.
- If further plans were shared and discussed with villages first
- It could only be positive, helping to develop the future for generations to come
- Gives the parish more of a say on future development. Bespoke policies for the parish
- A say in future development is vital
- We can see where we are going
- As long as the planners/officials really do take notice of it and don't ultimately have their own agenda
- Need to minimise the chance of poor decisions as seen in other areas locally
- More business for local businesses
- essential

- Our community/parish needs could be overruled by Cornwall Council or even National Policies
- Yes - sets boundaries and limitations to potential development. Need to keep what makes our parish special and keep it a place that is desirable to live in.
- It can lay down the base rules to benefit the community potentially reducing animosity and disputes
- It allows our parish to decide what is right for the people who live here rather than being told what will happen by outside people
- Providing planners and developers use it to assist them, It will help the parish steer itself to where it wants to be
- It would be good if this could bring all local people together, considering what they want or need
- By helping the local community
- Hopefully as a parish we will be able veto planning, unlike the case of the playing field
- This will give a planned???? ????? To the development of our village
- Yes indeed for the reasons above and also then people can say “with ref to our NP...” in relevant situations. It gives some credence to our value as residents

6) Housing comments?

- We should be able to choose where and what type of housing - a self-building project, and along the lines of what the needs of the community are
- There will be a need for more housing in the future but if we don't see more council houses being built then who's going to profit???
- Housing that people can afford to rent or buy not the present farce in the system, and not open plan
- Access road to any housing development to be beyond Community Centre, not through the village as already congested. Proportion of starter homes for the over 60's
- e.g. single story or chalet style with ground floor bedroom and bathroom and one room with on suite over as well as a proportion of starter homes for first time buyers and family homes
- Some to be include for people on a higher income
- Affordable housing
- To control the number of houses put up
- We would like to see more affordable starter homes to avoid teenager/20's having to leave the village
- More housing will come. Have a plan for location and price
- Limited low number only until new roads school are provided
- Any housing to include bungalows for elderly and very accessible - no steps. To retain the balance of the village developments should include low cost housing
- Make affordable housing for local people, located within appropriate areas - this could be discussed
- I would like to see more housing for local people, if the sewage system can handle it. Housing would need to be located within the appropriate areas
- Affordable housing for local people, dependant on where it is to be situated
- Not too many houses being built
- For more development purpose only which includes affordable homes for young people who have work in the area NOT for people who purchase second homes, as some second homes in the parish remain neglected and empty
- More housing could turn Trispen/St Erme into a satellite town of Truro
- Provision for larger housing 4 bedrooms for larger families. All new housing to include renewable energy facilities e.g. solar panels. Developments must include funding to supplement health services. Development must be controlled and not allowed to spoil the neighbourhood by over development
- Small developments that will not out do the social status of the village
- Affordable housing for young people is essential (whether to buy or rent).
- Housing to fit in with the environment and not to obstruct country views
- Yes the VDS throws up a lot of views on housing, which need to be followed through in the NP
- Need to consider effect another development would have on village. Green space essential
- To keep our young people in the village but only on any brownfield sites

- Only small (45-55) developments so as not to unbalance the village - increasing the size gradually. Affordable housing must be included in every development
- Limited family housing, affordable for young people to own their own
- Too much housing I feel would not be necessarily be good for the area
- Any additional housing should be for local people and should be balanced with open spaces and not over development, we don't want the village to lose its community feel
- We need to control how many and where additional houses go
- We need retirement bungalow, for elderly and disabled in the parish
- We have enough houses in parish. But we need retirement bungalows for elderly and disabled
- Restrict private rental market, keep houses free for sale to families
- Local people
- Housing for families but also for single people and younger people who would like to leave home
- Individual plots for individual developments to help locals stay within the village
- It's important for youngsters to have affordable housing opportunities in the village
- Small individual projects, self-build and character housing should be the focus of any future housing
- Individual projects and larger houses to accommodate local people so that they can stay in the village
- Should be affordable housing for local/Cornish only and be at the top end of village and not Truro side, so as to keep the village as it is now
- We desperately need a better balance of housing, larger family homes are in very short supply (4+ beds) and no retirement home provision that I am aware of
- We need more larger, family homes and no more affordable housing as we already have enough
- Any new developments need to be appropriate to the existing infrastructure and facilities with in the village
- The area has reached a suitable size regarding the number of houses it holds and any further expansion ought to be small 'infill' projects or extension of existing houses
- Whilst realising that for profit reasons and no thought to anything else including where houses are built and how many there is a shortage of accessible bungalows for elderly and disabled
- No more high density housing
- We have just had a new development and too many houses would swamp the village
- A critical aspect for any parish. Should include not only totals, total in any single development, style, size, affordable housing and amount of off road parking. Also include solar
- Scale/number of houses and location should add character of village and not detract from it. Also a good mix of sizes i.e. 1 & 2 bedroom as well as family homes

- The expansion of villages and sustainability requires housing, but a plan could help to set planning priorities
- Do not use viable agricultural land for anything other than agricultural uses. Restrict housing to brownfield sites (if any) and 'infilling'
- We will have to have extra housing but not a huge development such as Trevispen Parc
- For the benefit of the homeless - affordable homes for people to buy
- Affordable housing for first time buyer
- No large housing projects as the amenities - roads/school etc. not adequate. Smaller developments may be acceptable
- Some to be included for people on a higher income
- While there is a need for more house-building, both low-cost and open-market, and indeed the scope for it within the parish, the emphasis should be on small developments in suitable locations throughout the parish
- We would need a better mix of size housing, but do enjoy living near various aged neighbours
- Yes it would be nice to meet new neighbours and more customers for the local shop and businesses
- Protect future villagers from wind turbine syndrome by concentrating new housing to the south of the village. This will also protect the views enjoyed by so many to the north
- To restrict open spaces being lost to housing developments
- We need affordable housing and social housing to rent. It would be useful if second homes could pay more council tax to support local infrastructure and amenities
- Should be largely affordable for local people, no second homes?
- Housing should be affordable for local people to purchase. No second homes
- Selling all the fields off for housing is not right way for the village
- Allotments are needed in village for people with small gardens
- Too many houses being built in our village
- Affordable 3 bedrooms and above, and flats
- Needed for local people perhaps self-build, 3 bed and above
- As long as they are affordable and for locals first
- Any new houses should not be little hutches and have a garden for children
- Local needs, highlighted in VDS to be delivered
- Because more people can live there
- Won't be able to avoid new housing
- Important for communities to expand but sets limits to local demand. Sets boundaries for good area to development vs more difficult sites. Keeps our amenities and benefits. New Wainhomes - do we need more? Need good design in keeping with cottages around Trispen.

- Housing is emotive and there are only a few minor sites suitable for its location. Better quality of design/layout is required to improve the community.
- Housing needs a limit - boundaries have to be sensible
- It should be based on the need for an affordable housing stock, both owner - occupied and rental
- Needs to be planned carefully with extended services to support any further housing developments
- Would li like to see guidance on: development size, housing provision, design/architectural style, housing/amenity
- We need to have some say in proposal planning applications
- Providing roads, schools adequate to cope with small amount of residential buildings
- What do local people really need - how many bedrooms/bungalows for disabled
- Village needs low cost housing
- We need more affordable housing
- Individual or small new housing
- Yes providing everyone agrees where new housing goes in the parish
- Housing needed but careful and informed choices should be made as to where, when, how and type
- No way of avoiding it

8) Business comments?

- Small scale business is important for the sustainability of any community, possible work from home opportunities
- I would like to see the pub protected from future demolition!! (It's happened elsewhere)
- No shopping developments or factories, small business from home would be ok
- Truro provides these
- Again important to provide and retain work in the local community
- But I don't see real opportunities
- Small business only
- Small business opportunities for locals - no major industrial development as this is essentially a agricultural village
- Only if local people want to run their own business and employ local people were able to benefit and to exclude industrial. Concerns that would destroy the village life of the area
- Butchers shop. Fishmonger
- Small developments that will benefit the folks who live in the village
- So people can work in the village
- Local part - time and full time vacancies to be advertised locally and on-line. Any opportunities would be welcome, also for the over 50's and 60's group
- Possibly, although I think the scope is much more limited
- Yes to keep the village alive
- Yes for local development - opportunities for small businesses, no large industrials
- More facilities. Not enough for size of village - Launderette, Chinese restaurant
- There are adequate local opportunities without more business in the immediate area
- There are plenty of employment opportunities within easy commute. This is a village not an industrial estate and that is how I like it
- Bigger shops / more shops local employment. Threemilestone is a good example of village
- Would like to see rural workshops maybe small units and to protect our small farms and smallholdings
- It would be good to have more business opportunity/employment closer to home
- Homework and small business units may allow parishioners the opportunity to work closer to home
- I think so, but supply and demand needs to dictate this too some extent
- There a number of people in our parish that run business from their own houses and so small non industrial units would be useful
- We are very close to the city of Truro, already have a great shop, school and public house
- Possibility of providing small scale industrial units to allow local businesses into the village/parish
- Set out where business units could go

- This is an area lacking in the parish and yes this is vital for sustainability and local economy
- Industrial units could be a good idea but where would they be sited bearing in mind comments made to question 5
- There has to be something to keep young people in the village
- For the use of local people with small business projects
- No big shopping developments or factories / small business from home would be ok
- I did once prepare and submit a draft for a Building and Associated Trades Cooperative within the parish.
- Our youngsters need more opportunity to work and stay here
- A better shop that opens a later time and more facilities for the local community
- No large industrial business but perhaps develop a small, low level area of workshops and offices to give opportunities to current home workers or start up business by villagers
- Another shop longer opening
- Small business possible
- More smaller businesses like a shop
- Already have a successful shop, a pub, garage, farms, accommodation providers and many internet business
- Creates jobs and sustainable income for families - potential in Trispen
- Small (perhaps niche) business parks/developments are important. The village/parish is well located and should be attractive to investors. Location is key to benefit the community
- Focused and small rural businesses
- This is the future for our children and for the continued prospering of the village
- St Erme Parish location has much more potential for business - excellent transport links especially a business plan to encourage organisations to the area would be ideal
- Small units for village businesses presently working from home may be useful
- Small local businesses would be acceptable
- Small businesses are more appropriate to the village
- Small businesses for local people
- This parish needs small workshops for local people to run their own enterprises
- Small individual???? Industrial units
- Yes if all agree
- Moving forward as a community we should be open to new business ideas and opportunities - then make an informal decision

10) Leisure & Community comments?

- Second and third phases should be looked at for the community centre, possible skate park in the school playing field, other uses for the village hall
- A swimming pool would be a nice dream
- A swimming pool
- These are adequate
- The possibility of badminton at the Community Centre
- It would help families
- Important to offer local facilities to avoid the need to travel and to retain local identity
- Good for morale
- Add to existing facilities
- A further expansion to the existing facilities to provide indoor sports area would benefit all
- Help St Erme Village Hall to finish refurbishment and up keep so that the people of St Erme have easy access to leisure facilities
- More activities so that children have more available
- We need additional car parking in addition to that available near community centre. E.g. Any new development along Chapel Road to include Public Parking
- which would provide access to shop/chapel
- Only add to the facilities that we already have
- Fitness suite in village
- The new community centre is an asset and obviously well used by many local groups. Activities at the new centre need to be well advertised within the village.
- What about an annual community walk? Xmas or New Year? O a community summer picnic
- I don't think this should be a focus area of the NP
- To expand on the present facilities only
- Existing facilities extended only - A sports hall for the Community Centre and support to upgrade the kitchen and toilets at the village hall
- More sporting activities for the young
- Community Hall is great, But not enough is done for teenagers
- There should be more leisure facilities for the older members of the community. It's not all about the youngsters
- Community centre to include leisure facilities, better access to the public. Expansion is essential
- The only way forward is for the community centre to be better supported perhaps the village hall and centre could merge under an umbrella committee for future survival

- Facilities for the youth of the village (partially teenagers)
- New facilities for youngsters would be fab
- Facilities are good, but a project to provide teenagers more leisure and community facilities would help to avoid any anti-social behaviour
- Community Centre is brilliant - needs more advertising
- To include maybe evening classes etc. to allow/encourage more people to keep up with up to date information/technology. To also be more available for elderly and disabled
- Development could assist in the funding of community facilities/improvements to existing ones
- Local amenities for leisure are vital in any local plan
- There is enough in the village but they need support to keep going. Members of the community need to get involved
- Think we have enough
- I think the leisure and community facilities are adequate
- We should capitalise on the excellent facilities we already have
- More facilities where young people can chill out and get out of trouble
- Protect what we have and extend facilities at Castle Field to include a sports hall - this to be multipurpose for indoor sports, open day and evening
- More areas for children to play
- Swimming pool, finish com centre, gym and sports hall
- Completion of all phases of the community centre
- Gym
- Provision for youth
- Finish phases of the community centre
- Skateboard park
- Many clubs, leisure, community events already but hopefully a plan would safeguard these
- Good for wellbeing and creates places for people to come together. Would create local jobs too
- Does the village need more? There is a village hall/community centre/cricket pitch/football field/ playgrounds/footpaths/playing fields/churches.
- There need to focus on young people - not just on those for retired residents (which are???)
- Access to indoor facilities are limited - use of existing facilities for community leisure? E.g. school hall, badminton, community centre/village hall - table tennis youth club
- We have an excellent Community Centre and should aim to encourage a variety of activities there, for all ages, separately and together
- We already have community and leisure facilities

- I think the village is now well catered for as regards this.
- We are lucky to have the luxury of a beautiful community centre and village hall within our village. Let's look after them
- Yes if all agree
- While the community centre offers a hall and sports grounds - perhaps consideration should be given to other activities - bowls, tennis courts, seating "quiet area for contemplation?"
- To safeguard the facilities we already have

12) Education and Adult Learning comments?

- Possibility of using the school more in the evenings
- It needs a wider area to be viable
- Only local school, beyond that not enough demand
- I don't see much change of it developing
- Add to current facilities
- Consideration of school extension if more houses built, possibly evening classes at the school
- Adult learning in the day time and evening
- More activities for older people in St Erme
- Not sure this is a priority given facilities elsewhere
- School extension if more housing is built
- The primary school has a good reputation which is excellent. Adult learning opportunities need to be well advertised. We could do with more adult groups that are affordable
- Very limited scope
- For those that can't get to Truro essential
- Not bothered - majority decision
- Education for young people I.e. evening classes - sport
- We have an excellent primary school, nursery facilities and Truro City offers all the adult education needed
- Computer and internet
- Classes in school and hall e.g. computer skills
- Great school
- Allow the school to naturally expand and do not hem the school in. Protect land around and close to the school, for future development of the school
- Education opportunities for adults without having to travel would be great
- If I required education I would go to Truro
- Opportunities for people to have adult learning without travelling would be very advantageous
- It would be good to have more opportunities for adults
- Consideration needs to be given to the school and possible expansion if more housing.
- Take into account the impact of new housing development on the local school
- To include maybe evening classes etc. to allow/encourage more people to keep up with up to date information/technology. To also be more available for elderly and disabled

- Parking Ltd around school, but maybe Community Centre could be a good venue
- Good education facilities (both in quality and quantity) are needed for local children to ensure they meet minimum standards
- Adults tend to be left out of adult learning
- The Community Centre offers excellent facilities which could be further developed exploited
- Extend the local school to help young children to learn nearby home
- Evening classes at the primary school and community centre
- opportunities for education and adult learning to be held at the Community Centre
- Yes if training
- To save their journey and try to get adults moving
- Successful primary school, pre-school, some adult classes. Plan could emphasise the importance of these
- Given people potential to carry on studying without the need to travel far, with friends
- Schools are important - perhaps a school that is not caged in would make more sense. Commercial/industrial development may tie in with this
- With good facilities in Truro it is hard to make this a priority
- Education for young children will attract families to our village which will help sustain the life of the village, Adult learning opportunities also essential to keep the village alive
- Community centre has possibility for adult education - engage colleges to ring courses
- Wrap around care for primary school kids to enable working parents
- The school is an integral part of the community
- It would be good for young and old people who are not able to do full time courses
- Once again it's a good idea but would need to be a joint effort with ccc
- Public access to on-line services
- Yes very important
- As the primary school is such an integral part of the community it should be included and consulted about the NP. Adult learning perhaps not so necessary.

24) Historic and Natural Environment comments?

- Any historic places with in the parish should be protected against any unnecessary alterations, so the main character is kept.
- The nature reserve at Trevella and local woods are important
- It would be beneficial to see Trevella Valley turned into an A.O.N.B
- It is very important that we keep the history of the area in tack
- Needs to be kept and not turned into the overflow of Truro like other places
- The historic natural environment is valued by all who call St Erme Parish their home. WI's are campaigning nationally for preservation of natural environments to protect the bee population etc.
- Encourage and protect biodiversity
- Need to preserve our heritage
- Will encourage wildlife and also rural setting
- A small booklet for sale locally about the history of the area would be fantastic to read and generate some income - hopefully. Natural environment is pretty and perhaps some photographs of the countryside could be put into a booklet for sale. Ask!!! Both could be sold at village store. Good for tourism too
- The natural environment needs protection with in the NP
- All to be protected, electric fences alongside footpaths are not right
- Preserve our church, maybe more friendly - coffee mornings
- It is the natural environment surrounding the village that makes it such a nice place to live. The natural environment should be protected along with the wildlife.
- Eco structure is important
- The historic and natural environment needs preserving, When its gone its gone
- Protect our rural environment, trim hedges, drains and restore hedges and field borders back to the original settings
- Preservation of it
- It's important for the area of natural beauty are kept i.e. cricket and football fields
- Preservation should be maintained
- Preservation
- Again this was the start of our community and needs to be looked after
- These areas have to be preserved
- Would like natural spaces left for wildlife and native plant species
- Items that may be of historic interest need to be identified and detailed in the plan for protection

- Yes if the plan wishes to be realistic this is vital
- The Tregassow Solar Farm Fiasco!!
- Limit the visible impact/number of developments in parish
- Assistance with maintenance of historic buildings and their grounds
- Important to keep any historical features
- It is very important that we keep the history of the area intact.
- Historic - It's good to see change for the better, but our past has made us what we are now
- Nature - We live here to enjoy the rural aspect - must be protected
- Keep the existing historic features
- Yes using facts found for the previous plan
- All should be protected. St Erme Church and churchyard to be protected and maintained
- Finger posts, listed buildings
- Finger posts, milestones to be maintained
- Yes because nothing should go where the church and chapel is.
- Preserve what we have
- Feeds our sense of belonging, Important to have history - lots around St Erme! Need to retain heritage metal detecting parties!! Archaeological dig?
Preserve phone box as feature - they have been invited elsewhere and its full character!
- refer to Tregassow Solar Farm debacle as an example on how not to develop with the historic environment
- Natural environment protects hedgerows
- Protect agricultural land
- Cornish hedges must be preserved
- Need to be maintained
- Preservation! Commitment to preserve/improve. Link to school learning/community groups
- Environment is important and should be left to the council
- It would be good to renovate the water pump near the church
- Considered and conscious care at our local history is vital!
- Preserve what we have

14) Infrastructure comments?

- For any development the infrastructure needs improvement, sewage, telephone, internet
- Another shop that opens later and a 'chippy' would be nice
- Some roads are in need of repair
- It must
- Needs more phone lines and gas would be a gain as an alternative to electric
- It's vital to cater for any new development
- Current sewage needs updating
- All infrastructure needs review as close to capacity - no more houses without this
- Progress towards reliable mobile phone signal, High speed broadband rollout at ALL please
- Internet and mobile phone access both a problem in the village. We pay the same tariff as those with a much better service
- If more dwellings are built the infrastructure must be able to cope with the increased demand. As it is, some drains around the village are blocked and rain water flows over.
- Collection of garden waste implemented, a free service linked to the community charge
- See note re health provision. This must be a link between health and other infrastructure requirements
- Already inadequate, If more people come in this will be very necessary
- So we are safe
- Drainage in Trench Creek close needs improving, not good at all. Garden bin costs goes up annually which is not good
- More internet possibilities, not good generally in the village, they are always working on the box at Eglos Road
- Good infrastructure is vital for sustainable development
- We don't want to be left behind
- To benefit existing properties first. No more development until infrastructure upgraded
- Internet is hit or miss at the moment
- The infrastructure is unable to cope with the demands of existing properties, so needs improving before any new buildings can be serviced
- Bus routes to include later times and earlier into Truro. Cycle route in future maybe?
- Fibre optic broadband actually installed to the houses not just to the box, during the day the system does not operate at satisfactory speed at the moment
- Internet we don't currently have super-fast broadband which we would like in the near future
- Infrastructure is currently under pressure and therefore improvements to this must proceed any development

- All this needs to be considered if there is going to be more housing - internet access is already a problem
- This all needs updating the water and sewage especially
- No community can work without adequate infrastructure to support it
- Internet seems quite slow here
- I would like to see detailed impact on infrastructure on any affected infrastructure including capacity available for that area for any proposed development.
- Upgrades should be paid by developer
- Mains gas would be a huge bonus to the area. The chance to have it was wasted last time
- We need to have the sewage situation sorted
- Internet to rely on
- Gas for central heating
- All needs reviewing
- Some roads are in a bad state of repair
- The implications of the NP for these services are obvious and must be taken into consideration in drawing up and implementing the NP
- We seem already at breaking point on some services. They must enlarge before considering more housing
- Better internet connection and telephone cable, clean sewage and waste collection
- Should be mandatory that any developer contributes major sum to update water/sewage etc.
- Pressure to be put on suppliers of internet for improvements
- Faster internet
- Mains gas, telephone lines, internet
- Telephone improvement
- Sewage telephone, one-way system
- Waste collection for people to use it
- Seems to work well at the moment
- Plan in advance and set out structure means everything fits into place after. BT needs sorting
- Cycle route to Truro
- Sensible buses - Trispen to Truro is too well serviced
- This is probably a priority as no further development should start without it. Recycling should be promoted and highlighted regularly. Every new property should flows over.
- They have all been regulated by developers in the past. The telephone/internet provision is un reliable - there is a BT outreach van in the village, the

fault seems to get passed around

- Internet is now an important must in this community. Increased housing will reduce our current service unless new exchange boxes are added
- Sewage is also at capacity
- Important to meet demands of the village
- New developments should not take place without a plan for sufficient infrastructure
- It is public service and should stay the same
- Its best left to major suppliers
- As I understand any development will need improved infrastructure
- Yes where necessary
- This is so important after the BT fiasco at the Wainhomes development. Give the people a voice against these unyielding giant corporations
- All seems to work well at present, problems could arise with more housing

16) Public Open Spaces comments?

- Any new development should have enough open space for amenity and privacy. The open spaces we have should be protected
- I would be nice to see public spaces protected from mass housing developments
- Nice safe areas for sitting and children playing
- We should include this if there are likely to be any future developments
- Yes, they must be preserved
- Important, do not want to be overrun with houses
- Yes to preserve what we've got
- All current public open spaces to be retained and additional spaces created if more houses built
- We do not want all space taken by blocks of buildings. Areas to rest/reflect, children to play. Additional walking areas
- More people especially children - more open spaces
- To protect our open spaces
- Not sure if these are so relevant in our parish
- Need for dog exercising area as large numbers of villagers have dogs
- Definitely to keep the open spaces we already have
- Protect current open spaces and add more in new plan
- A dog area! As the chosen few use the lanes and paths as a dog toilet
- It would be nice to have a green area with seating where older members of the community could meet others to sit in the sun
- We need to retain all open spaces we have and if there are any large developments in the future we will need further areas for public access
- The cleaner keeps them very clean but dated needs some landscaping and foliage
- The 1970's/80's estate has become like a ghetto to live in, a revitalisation of the open spaces is vital for people to respect where they live
- Yes - parking, walking, teenagers interests
- important in the village i.e. parks and cricket and football fields Open spaces a
- More space for teenagers to use
- Yes - teenagers, dog walkers and car parking
- There needs to be a balance between open spaces and new buildings
- Keeping our existing public open spaces in vital
- These need to remain and be available to everyone including the elderly and disabled. We the public need to keep them clean and healthy which includes not only dropping litter, but to clean up after our dogs
- These make urban sprawls into pleasant communities

- Maintenance of open spaces needs to be supported
- Identify suitable areas/upgrades to existing spaces including??? Could be provisioned, funded partly through new developments
- Opportunity to protect and enhance open spaces and not lose them to development
- A lot of attention is given to planning; yet open spaces are often missed. What to protect and what to utilise in other ways is a vital discussion to be had
- They are very valuable to most people's general well being
- Why not
- Car park allocated area off road
- Yes children and teenagers should be able to have an open space
- Where young families can chill with their children and have a picnic and clean parks for the youth of today
- Protect those already established and all further developments to include safe play areas and space for community gatherings
- Public (and private) open spaces should be protected from building schemes
- It is important to have an urban conurbation that is an extension of Truro. St Erme as Current areas should be protected from development
- Current areas should be protected from any further development
- Protect and add
- To be protected
- Car parking area
- Car parking area for keeping traffic off roads and convenience for events
- Make people wanted to go there by cleaning it and cutting the grass
- Class with new housing!!!
- Given relief to the eye - too many homes and no greenery and space feels claustrophobic
- Protect agricultural boundaries
- Need to be well maintained into the future. This helps create a positive environment for all our residents
- Grass open areas are excellent - but no tarmac area for scooters/skateboards/bikes
- Trevella Nature pond have more potential
- Who is responsible for maintenance and litter collection?
- To keep the rural look of the village
- This issue has been overlooked in the past so it's pointless
- We are fortunate to already have public open spaces these need to be protected
- Very important
- Gain these are important areas for children to play, walks and responsible dog owners to exercise their pets

- **18) Highways comments?**

- Cycleway to Truro is a must, any new development should have good links to the rest of the village
- Speed cameras on the Trispen bypass are needed especially near the 'Rowes' junction
- A one way system around the centre of the village as considered in 2004
- Some roads are in need of repair
- Cycle path to Truro
- Footpaths especially need to be preserved and made usable
- Highways needs urgent updating no pavements in places and large vehicles pass only by driving on pavements a danger to pedestrians
- Access for the disabled with dropped kerbs for wheelchairs needed. Regular maintenance of footpaths and byways and general maintenance of roads o pot holes!!
- Ensure up keep dealt with appropriately
- Cycleway Trispen to Truro - I know a few people who cycle into Truro
- Help to improve footpaths if possible, improve road surfaces
- Notably maintenance of footpaths
- Re-surfacing of Eglos Road and repair pot holes around the parish including the new road
- Footpaths to be cleared and people sealing them off and obstructing them brought to book.
- Pavements kept in good order so that people can use them safely
- Provision of car park within the village for community use
- Only if proper upkeep is supplied
- Cycle path to Truro
- Road surfaces are appalling, especially Eglos Road, really bad pot holes. Needs immediate attention not random patching.
- Eglos Road hedgerows not always maintained well, bushes obstruct onto pavement area, needs regular cutting back.
- There are current issues which could be addressed within a NP
- We want to keep all present highways etc. open for all to enjoy
- Local roads need repairing more frequently - when is Eglos Road going to be surfaced
- To be properly maintained
- Cycle track to Truro
- A cycle/footpath to Truro would be a great advantage to enable safe cycling for adults and children. I think some people would walk into the city if a safe footpath were available

- Road to Truro very dangerous at the moment - take out the bends
- The A39 is not fit for purpose for the traffic expected to flow to Truro in the future. Carland Cross round a bout needs more thought
- Parking!, Cycle path to Truro, improved footpaths down Trispen Hill (including reduced speed limits)
- There are footpaths and roads that need to be maintained
- Road parking causes many problems and needs to be addressed.
- Cycle path to Truro to allow commuters to move safely is very important along with an improved footpath network
- Road parking causes problems - free car park would be great
- Footpaths really need to be marked better to have better facilities for use by the disabled
- The roads, especially on the way to village school are very busy and cars go quite quickly and close, no pavement
- Protect public rights of way, including footpaths. Cycle path into Truro. Insist on developers paying for upgrades to road network that will be effected by new developments
- Particular a safe cycle route to/from Truro
- Local parking issues have been a topic of debate as new housing is proposed. This will allow villages a say
- Very poor maintenance of roads at present - Especially the more minor roads. Make sure individuals or businesses that damage roads foot the bill for repairs
- Need to have the A39 extended as far as Truro
- Cycle/footpath to Truro. Safe access for large emergency vehicles, tackling poor parking
- Some roads are in a bad state of repair
- I regard these as critical issues for the NP, especially bearing in mind the increase in traffic to be expected arising from the developments on the eastern approaches to Truro
- A safe cycle path to \truro would be very good
- A safe cycle route (walk) into Truro would be great
- Yes more people to exercise and more places to clearly walk their dogs
- More regular repairs to existing roads. When will Eglos Road be resurfaced?
- By ways and footpaths need regular inspection, by walking groups, so that they are kept in good order
- Cycle Path
- Footpaths/cycle ways need to be protected and improved
- We need roads to be resurfaced because of pot holes. Pot holes also need to be filled in quickly
- The roads need to be better
-

- A lot of pot holes
- They should be maintained to a high standard and not allowed to degrade to the standard they are currently at
- All areas should be maintained to a high standard and not be allowed to degrade to a standard they are today
- Path from St Erme to Truro is in need now as the road is very dangerous
- Cycle way still to be built asap
- The state of the footpaths and bridleways, some are in a bad state
- Cycle to Truro
- Cycleway to Truro
- Bus service could be improved (Sunday)
- Cycle way to Truro
- Cycleway
- Cycle path to Truro needed, very dangerous road
- Esp. cycle path for ease to get into Truro. Very short distance but very dangerous as it stands. Lanes need to be prepared as part of village character. Village is one of few villages left around Truro - need to emphasise its strengths. Preserve highways that belong to village. Maintain parking for residents
- Cycle routes to Truro
- Trispen centre requires a landscape scheme proposed to enhance the village. i.e. road with the shop and pub
- Very view, byways and footpaths locally - signage away from roads needs some improvement
- Currently not in a good state of repair especially outside the front of the church (nothing done in the last 11 years) and the lane down Tregassow is dreadful.
- surfaces also need redoing properly not just patching up
- Need to keep the footpaths accessible and clearly marked
- **Public council should do it**
- Eglos road needs to be resurfaced
- Yes if all are in agreement with what has been suggested
- Yes let's see better - safer walkways along the school road!
- A cycleway to Truro would be very useful, many side/roads in a very poor state of repair

20) Renewable Energy comments?

- No more solar panels on land, solar panels should be on roofs
- Adequate solar and turbines
- Some villages have benefited from renewables - How about some free electricity
- Definite no to any more wind turbines or solar panels
- No Comment
- Solar but only on roofs
- To keep panels on houses wherever possible, especially on large buildings
- We have enough locally with the solar farm and Cartland Cross
- No Turbines
- No wind farms and un-intrusive structures only, that do not impact on visual amenity
- Any new developments to be subject to veto if visually or otherwise intrusive
- Stop having wind or solar farms near village
- Do not want windfarms or solar farm near village
- In so much as village residents should be given advice of any pending applications
- There is enough renewable energy around the area now in both wind farms and solar energy panels
- Include this with only future housing/ business development, but not the never ending provision of windmills
- No more wing farms, solar panels, preserve the village views as this area is frequented by tourists
- I think renewable energy is rather overrated generally. Definitely no more wind turbines. They are far too obstructive generally and are not all they are made out to be
- Probably shouldn't be ignored, but the parish has possibly already seen sufficient installation
- Solar power or windmill would be asset to village, solar on houses not fields
- Only if it doesn't impede on the farmland and our incredible views
- No more enough is enough
- Already to capacity
- Windmills and solar panels. No one wants nuclear power
- We do need more windfarms of solar energy farms spoiling the area
- No wind farms to spoil our landscape around the village
- We need to be able to prevent over development
- We need to be able to fend off any unsuitable developments so inclusion in the plan is essential

- No more solar farms, small wind turbines are ok
- Community venues and farm buildings could benefit from solar panels on roofs, the solar farms at present destroy the countryside we live in - no more of this
- Appropriate placing is vital
- I feel we already have a quota of renewable energy in the area, unless its solar panels on properties we've got enough windmills in the vicinity
- If anymore renewable energy projects ae considered they need to be appropriate to surroundings and sustainable without government funding
- Any further developments need to be appropriately placed i.e. not too close
- But no more wind turbines - we already have too many nearby
- No further wind turbines in the area should be allowed and further bighting of the area by solar farms ought to be very limited
- We have I believe said yes to more than enough in our parish and is it really benefitting here.
- Renewable energy id fine in the right place
- The roofs of commercial buildings to be used rather than green field areas
- The local countryside is being ruined by unnecessary wind and solar that has no benefit to the parish. Only the landowner. Plan should prevent any development
- that is excessive and has no benefit to the parish
- Parish should consider a policy to ensure any developments are in keeping with local views
- May not be a need for more energy generation if we all used less!
- Within reason so as not to intrude on our outlook
- No more solar panels on fields only on industrial roofs or houses
- No windfarms or anything that will disturb the landscape and be an eyesore
- We owe it to ourselves and to the community at large to depend on renewal energy for our energy needs.
- If connected to new housing i.e. solar panels on roof or ground source
- Yes no more solar farms more solar panels on local roofs
- Restriction of wind turbines and solar farms in sight of the A39 (A30 route already ruined). General low impact probably unavoidable - try to restrict to individual roofs
- I am in favour of wind turbines, but they should not be built right next to a village
- Solar panels on roofs not fields, plug in socket for electric car
- Solar panels on roofs not fields
- No more solar panels on fields only on roofs
- No more solar panels other than on roofs

- All new homes to be fitted with solar panels on roofs
- Solar panels on roofs not fields
- By having panels on peoples roofs and not on any fields
- Not too many solar farms
- Don't cover all our fields with solar farms
- But not on our fields to spoil the countryside
- We have enough of these - No solar farms
- But we have PV plus wind energy nearby - exhausted what our parish can take maybe?
- Renewable energy can be directed to micro generation and/or savings on individual buildings
- Protect agricultural land
- The area may have enough. Solar farms and wind turbines and CC may appear to have let it be a free for all on the planning side
- Keep control of what is being allowed in and on the edge of our village. We do not want windfarms and we do not want any more fields of solar panels. Anything in the future needs to benefit all residents e.g... Money off fuel bills (not just provision of a mini bus!)
- Consideration on long term impact - benefits to community. Safety of exploring children (high voltages)
- Not on a large scale, i.e. windfarms or fields of solar panels. Individuals should have right to choose whether or not their properties have solar roof panels
- Maybe we do not need anymore, so this should be in the plan
- We must generate energy by other means
- Any avenue that provides this type of energy should be a priority
- Please , please no more wind turbines
- I would not be happy about it but would discuss it is necessary
- Most definitely - the solar panels at Tregassow are an utter travesty and such a short sighted investment for the sake of a minibus! Really?
- No more solar panels

22) Rural Dwelling comments?

- Rural development barn conversions should be done to be in keeping with the area, should keep the character of the old barn style, not town houses
- Farms ought to have the ability to improve / convert old barns to housing which improves the area
- The neighbourhood needs to be kept rural
- Speaks about the nature of village - Important that the historic nature of the area is not lost
- Not sure about this
- They are integral to the village
- Not sure what is meant by rural dwellings. Conversion of derelict barns etc. would be welcome but not continued spasmodic taking of green productive land
- Preserve what we already have and any new building should fit in with the style
- To protect the rural feel
- They need to be well maintained with tidy entrances and well-maintained entrances. Need to fit in with the environment, not to brightly coloured for example
- Not a priority
- Need to preserve farmland and area
- If it allows for local people to purchase
- Keep as are - The character of the parish should be preserved. Only a few new houses, must fit in with existing surroundings
- Protect our old cottages and farmhouses.
- Open our church daily
- This is a rural community and should remain that way
- Rural housing should be tied to agricultural type livelihood so the countryside is not taken over by those who do not work it
- Protect old dwellings
- Rural dwellings should be included in the plan so often unwanted development takes place out of site and not discovered for years to come
- Any plans will go through the normal process
- Small industrial projects should be considered within what is a rural community
- Local people need the opportunity to build their own land and stay in the village
- They are part of the look of our parish
- Part of the character of any area includes the surrounding countryside. Abominations have no place in the countryside
- Covered by Cornwall Local Plan and NPPF
- Do not use viable agricultural land for anything other than agricultural uses. Restrict housing to brownfield sites (if any) and 'infilling'

- Not sure what is meant by this
- Plans for barn refurbishments to be favourably met
- Rural dwellings of appropriate design in suitable locations and can complement and enhance the environment
- Build where you want doesn't bother me. But may bother the rest of them
- Existing buildings to be protected and no more developments on farm land. Any individual buildings to reflect the nature of surrounding area/buildings
- Rural dwelling to be protected. New dwellings should be in keeping with the area
- Keeps it character
- In-line with character of parish (Area)
- In favour of redevelopment/improvement of disused barns
- planning favourably granted for disused barns
- They don't waste it and it does not rot
- Farms and outlying area need to expand as much as villagers to accommodate retiring parents etc., so families can stay together. They are part of the parish too.
- Expansion of no's of dwellings requires consideration.
- Define what is meant by rural dwelling i.e. are dwelling in the village rural?
- Local styles of building should possibly be retained. Developers should be made to think more about their designs and standards of finish.
- Need to be maintained
- Equal to urban housing - guidance should be given
- Must keep the feeling of village lives
- Maintain the look of rural dwellings to stay the same
- Traditional dwellings with cottage appearance in keeping with older properties
- Buy this do you mean planning etc.? If so then yes of course

26) Landscape comments?

- The landscape is beautiful looking over the countryside from 5 mile hill, the patchwork field pattern, coming right into the heart of the village from the north is important
- We still need more trees in the village
- More trees
- Provision of Village Allotments (preferably alongside school lane)
- No more windmills
- Of course
- See comment on renewable energy - to stop anymore solar farms destroying fields
- There is already too much desecration of the landscape, important to retain the hedges and ditches for wildlife and not create vast swathes of fields in a greater search for profit
- Preserve a pleasant, peaceful rural aspect for the community
- Conservation being of paramount importance
- Link to open spaces
- Will encourage wildlife and also rural setting
- Clean the area around the water pump and restore it
- Rural landscape is attractive and farm landscapes need to be well maintained. Public footpaths need to be better maintained e.g. opposite the village hall down into fields. Styles are not well looked after at all
- Again an important consideration, in a parish of such rich landscape
- To keep the present landscape
- Not to be desecrated by new developments. Protect flora and fauna
- Parish council do a good job, to keep our village rural
- The landscape is very important to Cornwall. It is what brings visitors to the county
- The landscape is what helps attract people to the area. We need to keep as much as possible unbuilt on and attractive
- Landscape should be protected and people's views and settings are important when considering large scale developments
- Protected and well maintained
- It's important for the village landscape to be maintained and looked after
- Landscape should be protected
- Protected

- The wonderful landscape in the area is becoming industrialised by renewable energy projects. This will soon reduce tourism
- We like the views we still have and I also ate part of the shape of the village
- Access to a doctor is a basic human right. Due to poor public transport even trips to Truro when unwell are too far
- The appearance of the village needs to be maintained - verges, trees, bushes and flowers. All add to this picturesque Cornish village
- No more trees on grass banks! Grass cutting is a more of a time consuming job! Sorry the hazelnut trees were lopped back, it will grow again
- Need to keep the views and agricultural land
- No more windmills
- Even if not a designated AONB, we are fortunate to have a beautiful landscape around the village which must be preserved and protected
- No more solar farms
- All new development must blend into landscape not stand out or proud contours. We can be seen for miles on main roads all around
- More parks and chill out areas for families and young people
- Very important to this village as windfarm flight indicated, preservation of existing areas essential
- Protect current landscape, remove any risk of flooding
- More trees planted
- Patchwork fields leading down to Trevella Valley important
- Patchwork Field Landscape of Trevella Valley should be saved, small fields next to village
- Road verges - green spaces, kept easily maintainable
- More effective ways of fining litter louts - but a difficult one to carry out
- Need to protect existing landscape especially Trevella Valley, patchwork of fields
- So there has got places where the animals live and the bugs
- Developments to be closely monitored to avoid damage to landscape.
- Landscape makes what we see pleasant and changes the way we think about a place. Planting of trees on approach to Trispen is lovely
- Perceived centre of Trispen requires investment
- Protect agricultural land
- Needs to be maintained in a good state in all areas of the village
- As highlighted in the Truthan Barton verdict, this landscape is unique and largely preserved through farming - without farming all could change
- Essential part of villages
- We must preserve or views
- We have a beautiful landscape lets preserve and enhance it
-

- Very important
- Let not ruin it anymore - no more solar/windmills get rich quick schemes!!
- Preserve what we have

- **28) Health Provision comments?**

- Doctors surgery satellite maybe once a week, a pharmacy delivered it local shop and then delivered
- Possible to pick up prescriptions from village
- A village surgery may be an idea. Sometimes you cannot park in Truro HP
- A doctors surgery
- There was a doctors in the village (probably too costly)
- A doctors surgery
- If practical
- Doctors surgery, once a week, would be good
- The need for a doctor's surgery and pharmacy in the village. The older generation find it increasingly difficult to access Truro surgeries
- Would be nice to have a GP surgery. As it would be especially beneficial to the elderly residents with in the village
- It would be nice to see a GP surgery back in the village at least once a week
- It would be a good idea to have a GP surgery within the village - maybe three times per week for the elderly who are unable to get to Truro
- Only in relation to exercise
- Health centre for minor problems. i.e. mothers and babies and Eldercare
- Additional funding for health provision must be included with future housing developments. Current health facilities struggle to cope with demand.
- Local provision much needed especially with prospect of provided home care
- Pharmacy
- Not sure what you mean by health provision as there is no Dr Surgery here? Do you mean exercise classes
- We don't consider that this is the job of an NP
- Surgery for elderly in village to save trips to town for their medical check ups
- Definitely essential for young and old alike
- The older folk find increasing difficulty getting to Truro surgeries with no car. Need at least a 1 day clinic in village
- Possible to pick up prescriptions from central part of village - shop?
- We badly need a doctors surgery at least once a week
- We used to have a surgery at the Chapel but since the local doctor retired that ceased. We could do with that facility again
- We used to use the drop in provision from our surgery at the Chapel, but that was discontinued when the doctor run it retired. A proper medical centre in the village
- would attract people to move here

- We need a doctors surgery and medical needs
- Needs doctors surgery, medical pharmacy in the village
- Drs surgery
- Rural doctors surgeries are not impractical providing better transport to the health park should be considered
- A doctors surgery would be amazing
- I go to Truro fir health related issues
- If a doctor or dentist can be included it would be a very worthwhile provision for the parish
- Doctor or dentist in the village would be amazing
- We should have a doctors surgery at the very least
- Mums with babies, elderly and disabled find it difficult to go all the way into Truro. There was a doctor here. The village has grown and matured, so even more we need one
- If the village grows any further then including possible surgeries (or mobile surgeries) in the plan will be beneficial to all
- Consideration of local health partnerships e.g. local clinics could be part of this
- We used to have surgery weekly at the Sunday school - now there are more people it is needed even more
- Truro is only 3 miles away with a new health centre by bus. Dr's will do a home visit if necessary
- Doctors surgery, medical unity, pharmacy desperately needed
- Access to GP in village more regularly
- If possible a clinic/pharmacy would be good
- There was a doctor in the village (probably too costly)
- No particular comment, but the health and welfare of the community must be a priority in the NP. A doctors surgery in the village would be desirable
- It is a nuisance to have to struggle with parking in Truro or public transport and steep walk up to doctors surgery
- Yes pharmacy or a doctors
- Clinic for doctors and nurse required with Wi-Fi. How big is Grampound? They have an excellent facility, so why not us? The Truro track is a nightmare for the elderly
- Possible doctors surgery om St Erme/Trispen
- Do we still have a mobile surgery in the Methodist Church? Could both Lander and Three Spires do one?
- Dr surgery, pharmacy outlet
- Drs surgery/pharmacy service
- But (prefer that we have a new hospital as well as Treliske to cope with new houses

- Doctors surgery plus nurse
- Prescription delivery
- To save their journey and to help the poorly people
- It would be good to have in a drop in surgery
- Yes please keep trying
- Doctor's surgery for those unable to travel. Provisions for prescriptions to be delivered, again for those unable to travel
- For older community and those that find travel hard, people will find it much easier to access what they need and would be more likely to stay healthy if easily accessible
- Surgery could be provided - village is large enough
- Important especially for the housebound. It is hard to see what may be done as the trend is towards larger and better resourced GP practising with the CCg/NHS be able to advise and could the local GP practises fill this in - They are essentially self employed
- What is there? Needs to be more widely advertised
- Truro for all services - not great for children elderly - transport commitment??
- Truro Health Park difficult to access. Bus now involves change in Truro. Taxi costs £12.00 minimum each way.
- Doctors surgery would be good - also chemist
- Some provision would be great if this could be arranged
- Local surgery to meet the needs of the elderly
- It would be good to have a local surgery at least once a week
- A local surgery or dentist would be beneficial
- Yes very important
- I think we are close enough to Truro for this not to be an issue

31) Any other comments?

- It is important to get people behind it from an early stage, so it will stand a better chance of going through in a referendum
- Planning Enforcement issues being dealt with properly
- I think all the headings in the survey are important - so I found it difficult to choose six. I would like to see St Erme kept as a rural village
- Provision for youth, e.g. youth club
- We feel that all the priorities should be included in the plan to ensure the future of life in this village
- Preserve/enhance public transport links
- Parking of cars, some provision made for parking of cars away from roads. Parked cars are a hazard and block access to emergency services, buses and essential for agricultural vehicles
- Youth Provision and library
- More information about C of E and Methodist church services. Latter has excellent pastoral care within the village and interesting activities, which are well advertised within the village
- It is an excellent idea and I hope plenty of people fill in and return the forms. Good luck to everyone who is working on the Neighbourhood Plan. Well Done
- We feel all headings 5 to 28 should be included leaving anything out of the plan may be effective
- Crime, the few youngsters who choose to damage and destroy i.e. bus shelter at Eglos road
- Parish council to adopt green spaces and unused dumping ground land
- Protect post office, shop and community centre.
- Proper consultation on the future of the village hall
- Time is the most important factor to ensure we are not left behind
- Car parks individual developments
- Transport, especially in light of the recent loss of bus service
- In addition to 28 if not a doctors perhaps somewhere in the village to pick up prescriptions
- Until this becomes so we need to keep in regular communication with people in and around the village of all ages to any new thoughts on what is and isn't happening here
- Plan is really important for the parish
- Bus services now we have lost Greyhound
- Doctors contact and retirement housing desperately needed
- Not as this time, but other issues are certain to arise as time goes on which may require involvement of the local population
- All the topics are important, leave nothing out
- Committee needs a rep from each identified zone within the village. This person can then deliver/collect to/from addresses in their zone and keep people

informed

- Planning Policy
- I think everyone in the parish should have a say on what's going on around them
- Allotments
- Provision for youth
- To clean the water pump
- More things for children
- Friends of St Erme - volunteers?
- The village need a centre - community needs a focus
- Trispen Hill requires investment
- The village needs a hear to identify it
- Designated dog walking areas - fed up with dog mess everywhere, support for maintenance of the church - it is a village church there for everyone, we should support its upkeep
- Start by improving the roads and new surfaces, address the infrastructure needs then look to other things
- Street safety - pedestrian verses car. Community safety - fire station proximity, police provision, ambulance coverage
- I can see the NP as a brochure for developers to offer as incentives - let's make cycle way prominent so they can offer this first
- Public transport
- Who will be responsible for running this
- Village map with footpaths
- I would like to thank the parish council for the work they do
- It depends on what is going to be suggested in our parish
